Good Morning Daron,

We would like to let know we have been trying to work with Lynn towards resolving this issue. We are forwarding the follow up email we sent to Lynn after our phone conversation from Last Monday.

We have been waiting to hear back from him about his calculations so that we can compare them to the BLM Calculations and then go from there.

We think that Lynn might have thought we were mining on the North Knoll, however we were only positioning large rocks in order to protect the public from the Mine area. No mining occurred and the rocks were moved with as little disturbance as possible upon existing historic disturbance. The area was so little it would not even be measureable. However as we stated in our last email and conversation we are willing to amend our area to include the other prospects on the 160 acre private mineral.

We just recieved the assesment letter from your office and are confused since we have been working diligently to get this clarified and resolved.

We need a copy of his calculations and he said that once the mappping guy got it done then we would get them to us, however the time on the order is approaching the deadline 10/31/07 and we need to clear this up.

As noted to Lynn we need a copy sent to us by email of all letters sent to us. Please note this in our file. Please read the forwarded email below and see the attached amended map.

Thank you for your assistance in this matter.

Best Regards

David Penney
